PROFESSIONAL SUMMARY

Full-stack Software Engineer with 5+ years of experience building web applications with React, Next.js, TypeScript, and Node.js. Remote for a US company since 2025 as the top code contributor to a high-traffic booking site, working on checkout, SEO, and analytics. Previously improved load times by 60% and deployment time by 70% on an ERP with 10,000+ users, and mentored 6 new developers. C2 English (EF SET 84/100).

WORK EXPERIENCE

Crewfare (USA, remote) | Software Engineer | Feb 2025 – Present

- Top code contributor to the high-traffic, customer-facing booking site since Apr 2025 (680+ non-merge commits, ~43% of repo history).
- Migrated a legacy booking flow to a modern Next.js stack, improving conversion rate.
- Owned end-to-end checkout, including guest details, payment, pay-over-time, discount codes, and cancellation policies.
- Built hotel search and detail pages, room cards, map view, date picker, and multi-room booking.
- Built manage-reservation features, including room date changes and add-on purchases.
- Improved SEO with server-rendered hotel lists, structured data, canonical URLs, breadcrumbs, and sitemap updates.
- Upgraded the app to Next.js 16 with Turbopack and the React Compiler, and moved forms to TanStack Form.
- Implemented analytics with Mixpanel, GTM, Hotjar, and PostHog, and maintained CI/CD and tests with Vitest and Playwright.
- Redesigned the team's AI agent skills around CI QA workflows.

Harmonit (formerly FRG Informática, Brazil) | Software Engineer | Jun 2022 – Oct 2024

- Developed a scalable web ERP for 10,000+ users with React and TypeScript.
- Improved ERP load times by 60% by loading data concurrently with Promise.all and Promise.race.
- Improved UI performance by 40% using React, TypeScript, and TailwindCSS.
- Built CI/CD pipelines with automated AWS S3 deployments and CloudFront caching, reducing deployment time by 70%.
- Worked on a Single-SPA microfrontend architecture in a team of 20+ developers, and mentored 6 new developers.

Harmonit (formerly FRG Informática, Brazil) | Trainee Developer | Apr 2021 – Jun 2022

- Completed 40+ development courses in 8 months (HTML, CSS, JavaScript, REST APIs) and helped debug applications.

EDUCATION

- Systems Analysis and Development, technologist program (1 year completed, no degree) — FATEC Garça (Jan 2022 – Dec 2022)
- Technical course, Systems Development — ETEC Garça (Jan 2020 – Jun 2021)

CERTIFICATIONS

- EF SET English Certificate, 84/100 (C2 Proficient) — EF SET (Jan 2025)
- Intermediate Next.js — FrontendMasters (Dec 2024)
